

ICN Gateway Profile Improvement and Expression of Interest (EOI) Workshop

Position Your Business to Win Work

Industry Capability Network (ICN) Queensland is hosting an ICN Gateway profile improvement and EOI workshop in Far North Queensland and we are pleased to invite you to attend.

This session is designed to help local suppliers maximise their chances of winning contracts through the provision of advice and assistance on how to enhance their company profile and expression of interest submissions.

Specific topics will include:

- Who are the ICN and what do we do?
- What is the ICN Gateway?
- How do major projects use the ICN Gateway?
- What does an effective ICN Gateway company profile look like?
- What are the improvements suppliers should make to their ICN Gateway company profile?
- How do suppliers express their interest in supply opportunities?

Major projects, including the [Mount Emerald Wind Farm](#), Adani's [Carmichael Mine Project](#), Rio Tinto's [Amrun Project](#) and the [North Queensland Stadium](#) are using the ICN Gateway and Black Business Finder to communicate supply opportunities and identify capable local suppliers.

We encourage all interested suppliers to attend a workshop to learn more about how to improve their chances of supplying to these projects.
