

# Regional Queensland Supplier Information Sessions

Position your business to win work

The Supplier Information Session will provide local businesses with an overview of Industry Capability Network (ICN) services and how they are utilised by suppliers and major projects, including:

- [North Queensland Stadium](#)
- [Adani's Carmichael Mine Project](#).

With the recent announcement of these projects, this session will provide you with information to help position your business to win work.

ICN is a pivotal connection between major projects and the best suppliers in the region. For more than 30 years, we have worked with local suppliers and projects managers to support local industry participation.

This session is designed to help local suppliers maximise their chances of winning contracts through the provision of advice and assistance on how to enhance their company profile and expression of interest submissions.

Come along to learn about how to access regional projects and raise your profile with major buyers.
