

# Your guide to submitting an **EXPRESSION OF INTEREST**

Projects

Suppliers

 What are you looking for?

 Select Location

Gateway by ICN is the pivotal connection between major projects and suppliers. In an increasingly competitive market, we give you access to a sophisticated business network that helps boost your business, with an immediate connection to billions of dollars' worth of project opportunities.

Expressing interest in work on Gateway is simply putting your hand up for work. You can express interest against individual work packages on Gateway. By doing this, it tells either the ICN Industry Specialist or project proponent that you believe your company can do the works listed and that you would like your company's capability assessed.

When submitting an expression of interest (EOI) you need to showcase your company's capabilities to ensure you are considered for the job. You do this by making sure that your ICN profile is as accurate and up-to-date as possible. This guide is designed to help you through the EOI process.

## NEED HELP?

**Our Industry Specialists are here to help you.**

**If you need any help completing your profile please call us on 1300 961 139.**

**Important note:** In order to submit an EOI you will need to have a business profile on Gateway. Please note that an EOI does not guarantee that you will receive a request for tender as ICN does not take part in commercial negotiations. It does however, guarantee that your name is put in the mix as wanting to be considered.

# GETTING STARTED

You can search for projects on Gateway by ICN or via your dashboard, however you must be logged in to submit an EOI.

Once you are logged in, you can search for projects from your dashboard and submit your EOI accordingly.

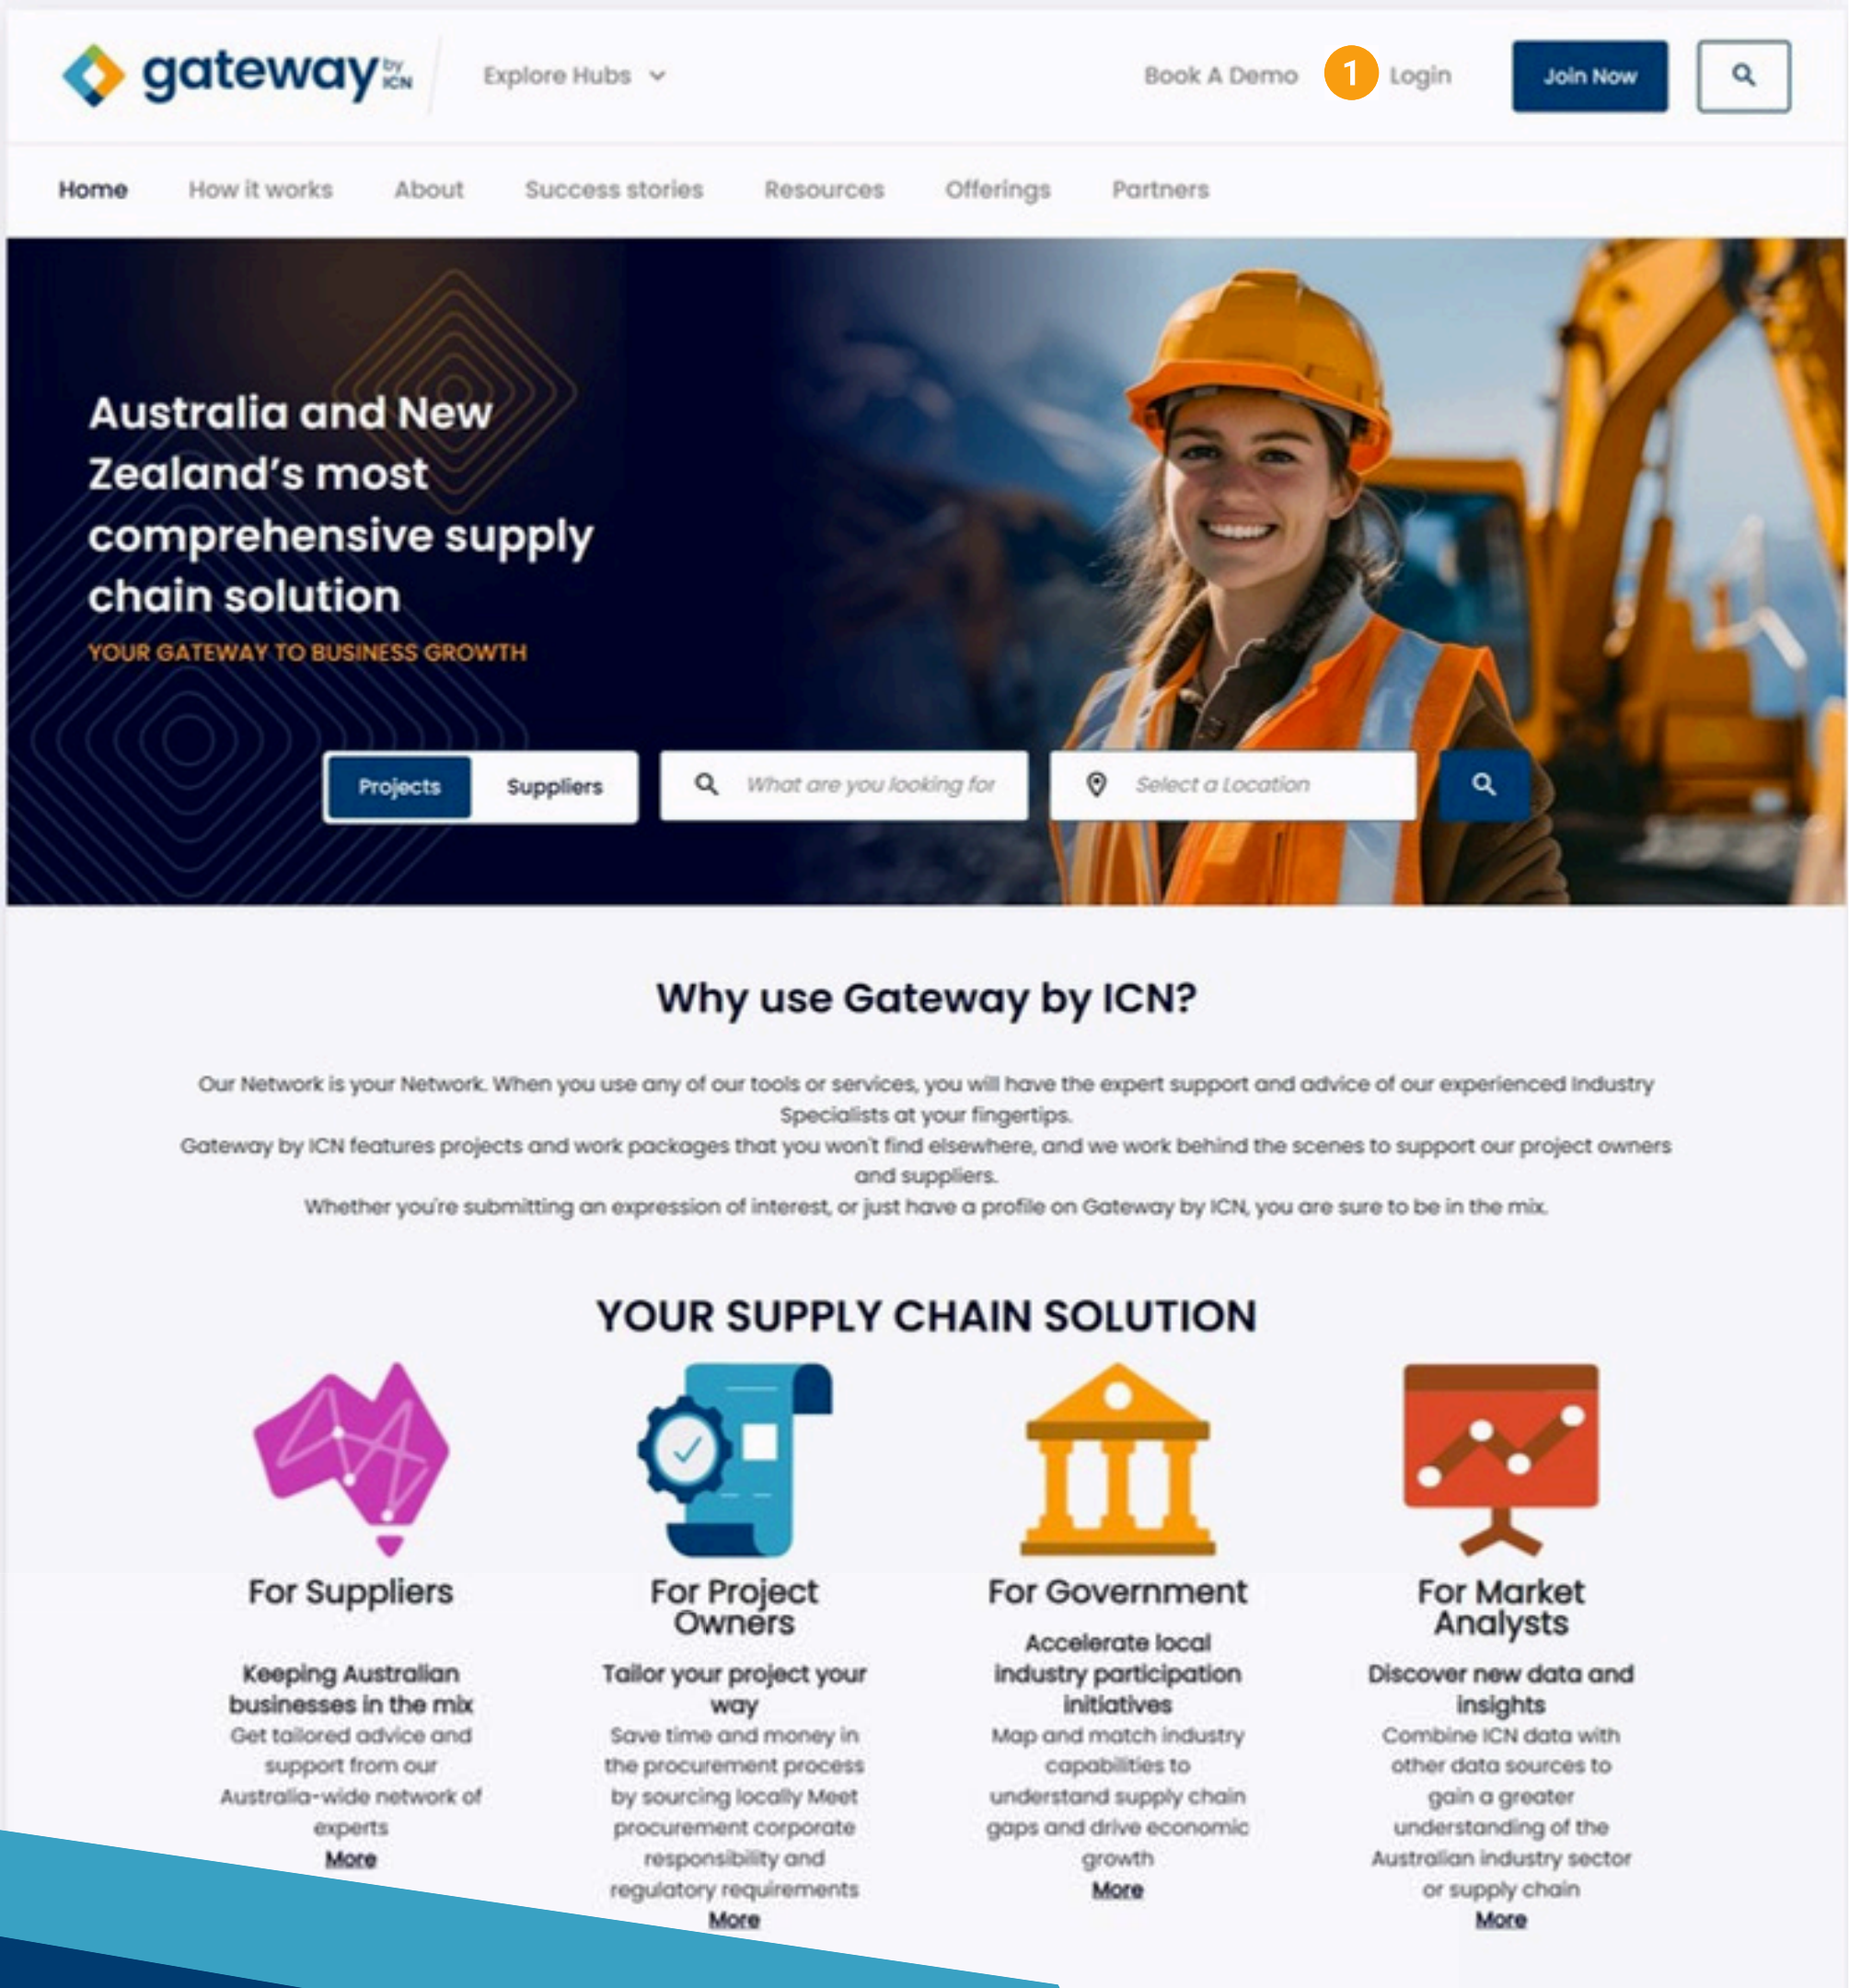

# LOGGING IN TO YOUR PROFILE

- 1 To get started, log in to your profile at gateway.icn.org.au and select ‘Login’ from the main menu.

Enter your email and password, then press the ‘Login’ button.

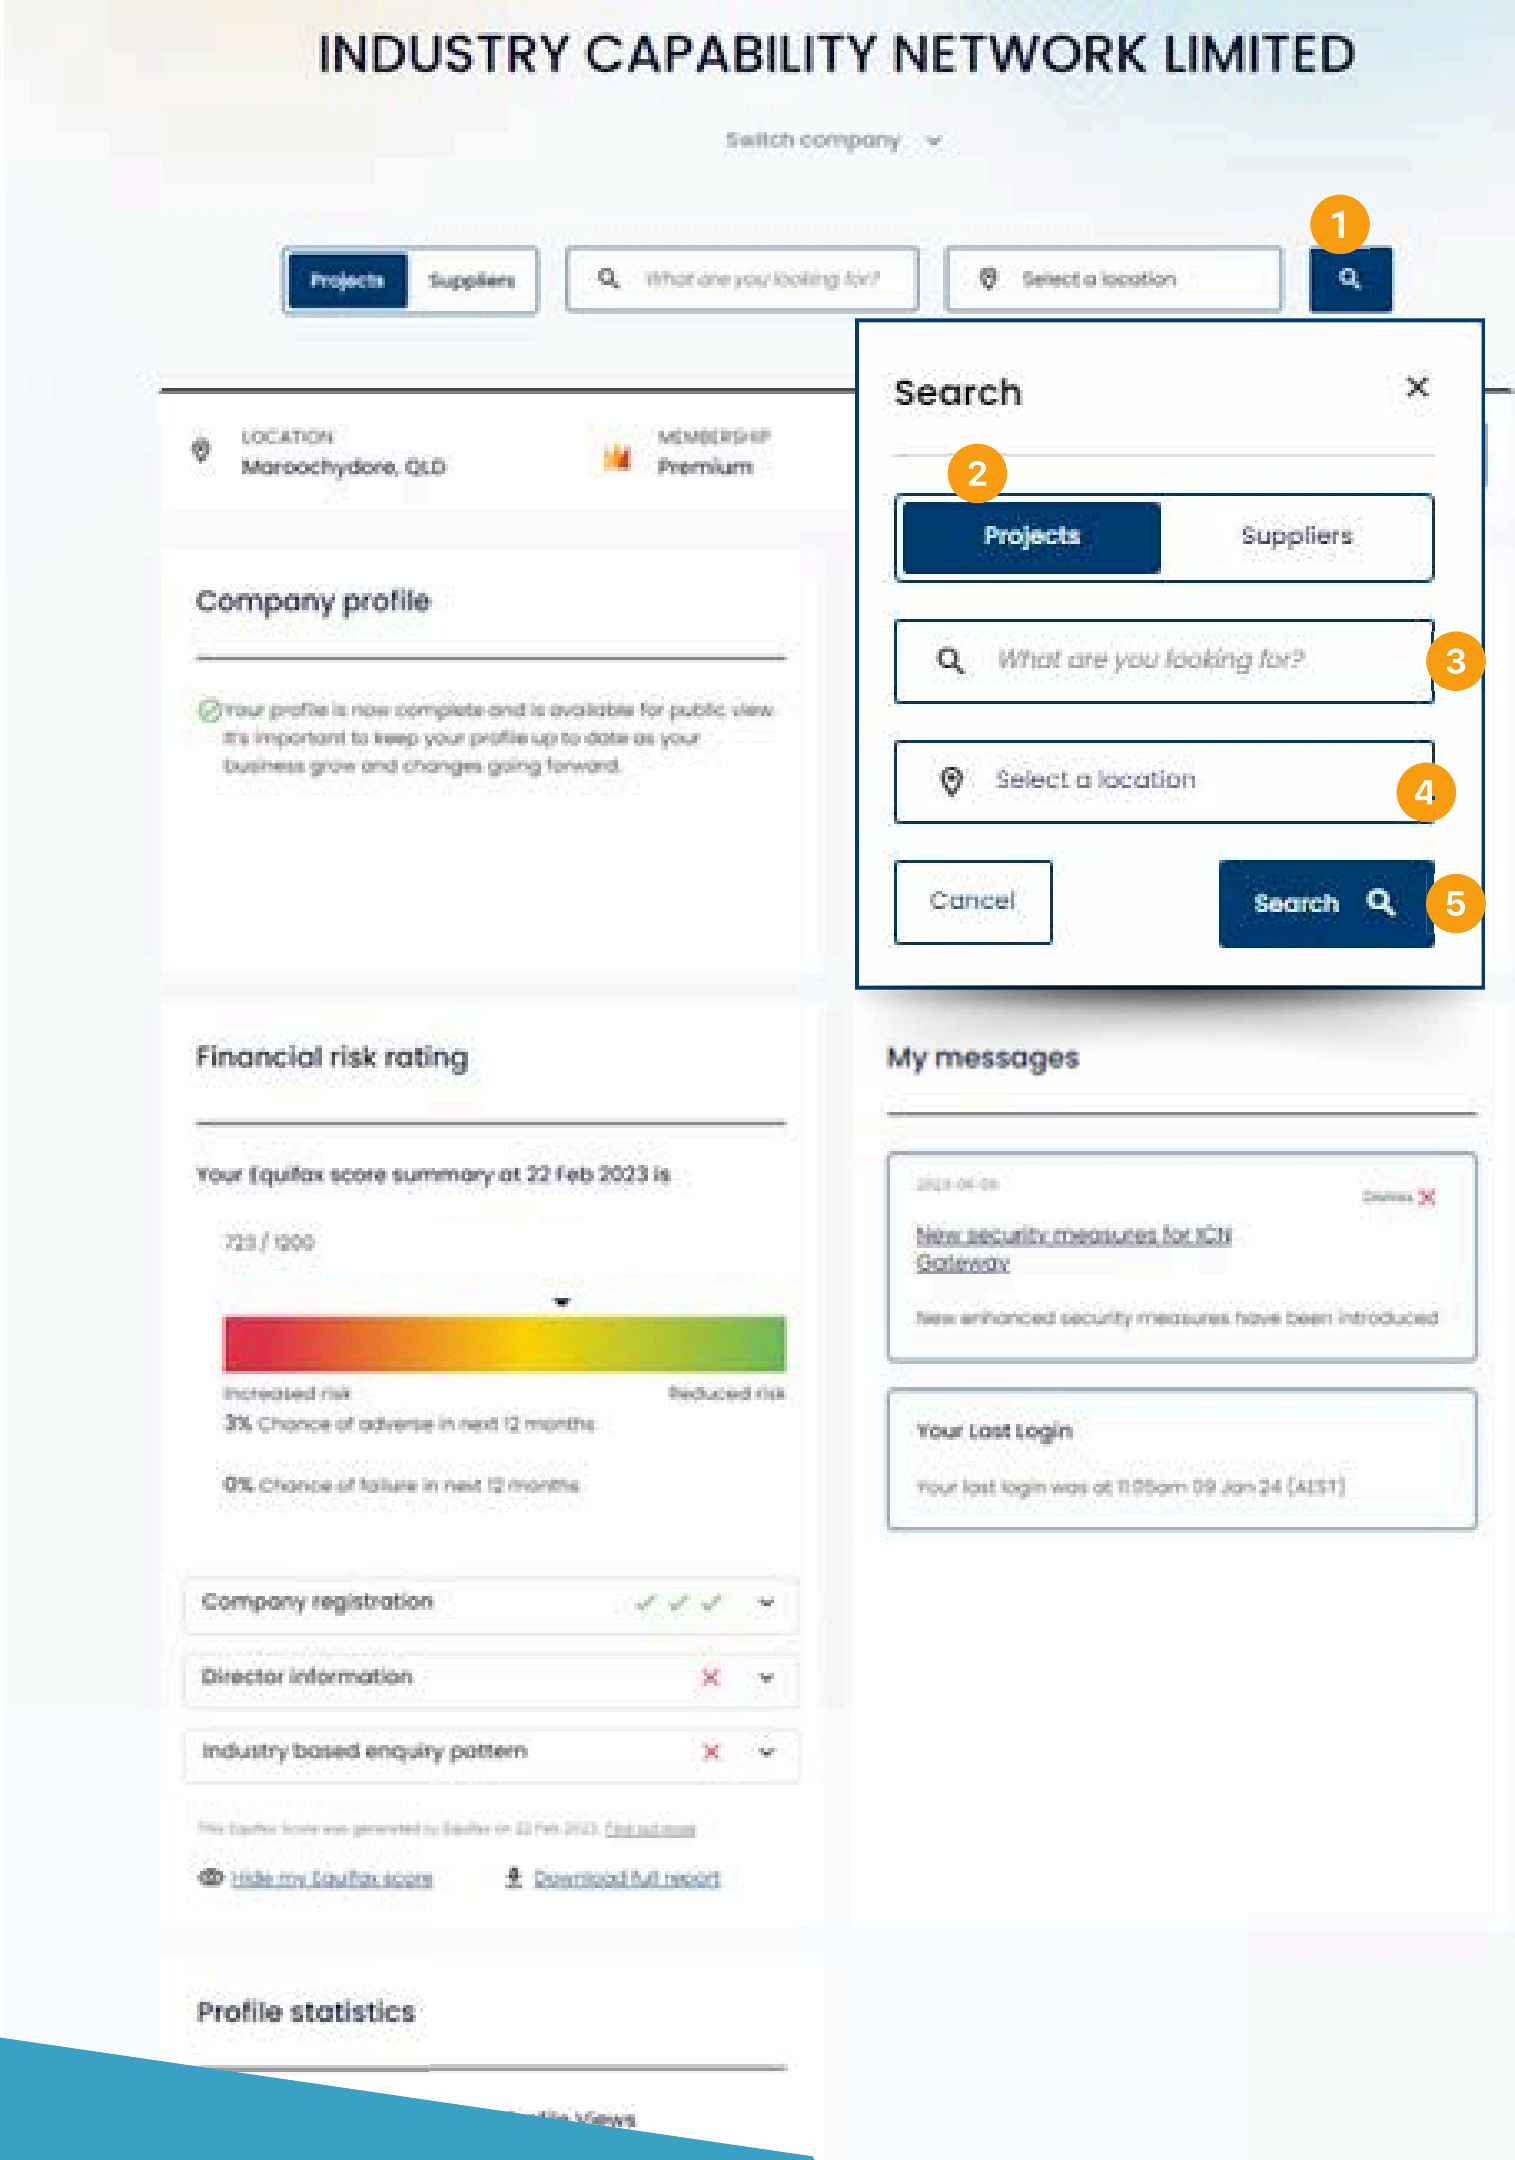

Enter your 2FA verification code.

NOTE: 2FA is set up on your account. If you haven’t already installed 2FA on your account you will need to do so now. If you are having difficulties, please refer to our Resources page.

# SEARCHING FOR A PROJECT

- 1 What are you looking for?**  
This is where you can search for projects.
- 2** To start your search, ensure the toggle is switched to 'Projects'. When active, it will be coloured blue. If the toggle is currently switched to 'Suppliers', you can change it by clicking or pressing on the button.
- 3** In the 'What kind of work or project?' field, type the name of the project you are interested in (if you know it), or add a key word.
- 4** You can also narrow your search by location or region, however this field is not mandatory.
- 5** Press or click 'Search' to trigger the system to return your results.

# SEARCH RESULTS

- 1

**Projects**

The projects matching your criteria will be displayed. To view a project in more details and to continue with submitting your EOI click on the project title to take you to the project page.
- 2

**Work packages**

This is the number of work packages that are available that meet your criteria.
- 3

Click on the project to see the project overview and available work packages.
- 4

You can sort projects by name or open and close dates to find exactly what you're looking for.

**Premium subscriber bonus:** If you are a premium subscriber you can access the work package directly - you don't need to find the project and scroll for the work package saving you time and effort.

Overview

Future Generation is a joint venture created specifically to build Snowy 2.0 on behalf of Snowy Hydro Limited. We bring the combined engineering expertise of three companies - Italy's Salini Impregilo, Australian-based Clough and US-based Lane Construction. Our team's pair local expertise with global experience.

Snowy 2.0 will supercharge the Snowy Scheme's existing hydro-electric generation and large-scale storage capabilities. The fast-start, on-demand generation of pumped-hydro and Snowy 2.0's massive storage capacity will be vital as more intermittent, renewable energy sources such as wind and solar come online and coal-fired power stations retire.

Snowy 2.0 will add 2,000 megawatts of energy generation and provide 175 hours of storage for the National Electricity Market (NEM), enough to ensure the stability and reliability of the system during prolonged weather events, such as wind or solar 'droughts'.

Snowy Hydro already plays a critical role in ensuring system stability and at times of peak demand, we keep the lights on. Snowy 2.0 will enhance our existing capability and ensure that we can continue to provide increased stability and security to the energy market well into the future.

The project links two existing Scheme dams, Tantangara and Talbingo, through tunnels and an underground power station with pumping capabilities. Hydro-power will be generated by falling water spinning Snowy 2.0's giant reversible turbines, which can also pump water in the opposite direction.

Snowy 2.0's pumping capabilities work in a 'closed' system - water is recycled between the upper dam (Tantangara) and lower dam (Talbingo) so the same water can be used to generate power more than once, making the most of available water. Snowy Hydro already has pumped-hydro capabilities at the Tumut 3 Power Station - it is proven technology used across the world.

The ability to store water and generate power on-demand means Snowy 2.0 can be 'switched on' very quickly. Snowy 2.0 will pump water using the excess electricity in the system at times of low demand. Then, when it is needed most, the stored water will be used to generate electricity within minutes.

# WORK PACKAGES

1 These details let you know the number of work packages that the project has. You can see at a glance the number of open work packages.

2 **Select Status**  
Choose the types of work packages you want to see presented. If a work package is open you are free to submit an EOI. Closed and Awarded packages can still be viewed, however it will be no longer possible to submit for these.

3 **Work package information**  
You can expand a work package to see its overview by using the drop down arrow. Take note of the closing date listed under the Partial and Full Scope EOI links and ensure you are in a position to lodge your EOI before this date.

4 **Scope documentation**  
The next step is to find further information about the package. If there is any associated documentation it will be shown here. You can access this by clicking on the download icon, which will start the download.

5 **Begin an EOI submission**  
To submit an EOI, select either 'Full EOI' or 'Partial EOI'. This will take you to an online form, which you must complete in order to submit the EOI.

**Important note:** If no scope of works documentation is available, please reach out to the ICN contact listed on the 'Project Overview' page to discuss (see 'Project Overview' section).

# SUBMITTING YOUR EXPRESSION OF INTEREST (CONT)

1 Complete all of the questions in the form. Any field marked with a red asterisk denotes mandatory field and must be completed in full to submit your EOI.

**Important:** Some of the information may be pre-filled from previous submissions. You should review this content to make sure it is still current and up-to-date.

2 When you are satisfied with your entries, you may submit your EOI by pressing the green 'Submit' button.

3 Alternatively, you may save your progress and return later, by pressing 'Save for Later'. Ensure that if you save your progress, you take note of the closing date and return to submit before the deadline.

Submit

2

By submitting this response you acknowledge that the information provided is true and correct and that your organization has the capacity to deliver the scope of work.

# VIEWING YOUR EXPRESSIONS OF INTEREST

- 1 Select EOI's from the top menu.
- 2 This will bring up a list of all of projects for which you have submitted your EOIs. Select the drop down arrow to see the EOIs you have submitted for each project.
- 3 You are able to edit any EOI that is still open. You can go back into these EOI's to edit as many times as you wish before the closing date.

**Tip for success:** Make sure your profile is as up-to-date as possible as details from your profile will be provided to ICN Industry Specialists and project proponents, along with your EOI submission for evaluation after the work package has closed.

- 4 You can download an EOI report for your own records.
