Minister for Central Australia Matt Conlan has welcomed a recent announcement that the Royal Flying Doctor Service has given the green light to a new $6 million development in Alice Springs.

Work on a new townhouse complex in Alice Springs to accommodate RFDS staff will begin in May and is expected to be completed by the end of the year.

Mr Conlan said the project would inject millions of dollars into the Central Australian economy with the RFDS selecting local company, Probuild NT Pty Ltd, to construct the project.

“I’d like to thank the RFDS for its continued investment in the local economy and on-going commitment to the Northern Territory,” Mr Conlan said at this morning’s official announcement in Alice Springs.

“For the RFDS to issue a select tender which specifies a minimum requirement of 85 per cent local trades and services as one of its criteria of the construction process shows great leadership and loyalty to the Alice Springs community.”

The redevelopment will transform the RFDS’ existing staff housing precinct on Simpson Street from four townhouses to a modern, secure and energy-efficient complex of 11 two-bedroom and two three-bedroom units.

**PTTEP Cash Maple Development**
PTTEP Australasia is planning to commercialise its assets at its Cash Maple gas fields in the Timor Sea off northern WA. The company is currently in the preliminary concept select stage, which includes considering both conventional Liquefied Natural Gas and Floating Liquefied Natural Gas (FLNG) options.
Source: au.pttep.com

**Santos Mereenie Field**
Santos has committed to a $100 million drilling and appraisal program over the next 12 months in the onshore Mereenie field in the NT. The Mereenie appraisal and development drilling program will target oil while also evaluating natural gas resources. If successful, Santos will consider a further drilling program.

**Vista Gold Mt Todd**
The NT Government announced this month that it has awarded Major Project Status to the Mt Todd gold project.
Source: mt todcom.au

**Western Desert Resources**
Western Desert Resources has secured a $30 million interim funding facility as development of the Roper Bar iron ore project in the NT hits the halfway mark. The company said the project, which covers 1900sq km over four granted exploration licences, was

**Projects**

**Armour Energy**
Armour Energy has wrapped up negotiations with NSW-based drillers Silver City Drilling, meaning its 2013 exploration program in QLD and the NT could start in under a week. Halliburton Energy Services has been contracted to carry out a six-stage hydraulic stimulation of the first well and to test the shale gas potential of Lawn Hill.
Source: energynewspremium.net

**Darwin International Airport**
Darwin International Airport (DIA) CEO Ian Kew announced that work on the expansion of DIA’s terminal will begin on 24th May after finalisation of the design and construct contract with developer Watpac.
Source: darwinairport.com.au

**AACo Abattoir**
Construction of the Darwin abattoir project has stalled and speculation is mounting that it may be abandoned altogether. AACo contracted Sunbuild to begin construction late last year at Livingstone, 50 kilometres south of Darwin, but the building company has since been removed from the site. Although AACo has previously denied it needs additional investment capital for the abattoir, an announcement was made yesterday of its intention to sell two Queensland properties so it can refocus on assets in the NT.
Source: abc.net.au

**Ichthys**
As at 29 April 2013, 14,684 company registrations had been received for the Ichthys project, NT companies had received 8,074 nominations and total ANZ nominations were at 13,859. There are currently 372 packages marked as Awarded on ICN Gateway and 16 new Ichthys work packages were listed in April.

**Awarded this month on the Ichthys project**
JKC (Ichthys LNG Onshore Plant Construction Contractor) have formally awarded: Accommodation Village Operations and Maintenance package to ESS Larrakia Pty Ltd, EPC Tank Works - Non Cryogenic to CBI Constructions Pty Ltd and Waste Management Services to Veolia Environmental Services (Australia) Pty Ltd.

Details of awarded packages, including contact information, can be found on relevant project pages on ICN Gateway.

Source: www.icnnt.org.au
Austrade’s Bangkok office has been approached by a customer who is seeking solutions for a range of challenges they are facing at their deep open cut lignite coal mine, located at Mae Moh in northern Thailand. The customer is planning to send a team of mining engineers to Australia in the near future (date not yet determined) to explore how Australian mining operators are handling similar challenges, with a view to potentially adopting Australian technology at its mine.

Austrade invites Australian companies with equipment, technology and services relevant to the following areas to provide information about their capability.

- Logistics and Material Handling
- Production improvement
- Coal testing and laboratory technology
- Environmental Management
- Drainage, sludge and pumping systems

For further information, please contact ICN’s Matt Hammond on e. matt.hammond@icnnt.org.au or p. 08 8922 9422

Monadelphous KT has been awarded the Onshore Gas Export Pipeline (GEP-1) Subcontract for the Ichthys LNG Project.

The Works include the detailed design, procurement, construction, testing and handover of approximately 7 km of the 42" onshore Gas Export Pipeline (GEP), approximately 3 km of the 12" Fuel Gas Pipeline (FGP) and associated facilities. The Project is in progress and currently undergoing design phase.

To view current packages listed for EOIs against the Ichthys Onshore Gas Export Pipeline, please click here to be taken through to ICN Gateway.

With many opportunities being listed on ICN Gateway, it is more important than ever to Register your EOI and have an up-to-date profile.

Australians across the Northern Territory will benefit from new and refurbished infrastructure, increased education and employment opportunities and cultural programs through projects that will receive funding of more than $4.4 million from the Aboriginals Benefit Account (ABA). The Minister for Indigenous Affairs, Jenny Macklin and the Minister for Indigenous Health and Member for Lingiari, Warren Snowdon announced 27 projects would share in new funding from the ABA.

“These fantastic local projects are receiving this funding because they will create new jobs, strengthen remote communities and improve the lives of Aboriginal people in the Northern Territory,” Ms Macklin said.

“The funding will support new projects such as refurbishing community facilities and delivering new programs that provide targeted support for Aboriginal women and youth.

New projects funded under the ABA include:

- $118,900 to the Tiwi Islands Training and Employment Board to refurbish a commercial kitchen for the community; and
- $55,000 for the school in Pigeon Hole to build a multi-purpose sporting court.

Company Showcase

Company: KAEFER Integrated Services
Contact: Peter Younger
Location: 118 Nebo Road, East Arm, NT 0822
Tel: (08) 8984 4993
Fax: (08) 8984 4973
Email: P.Younger@kaefer.com.au
Website: www.kaefer.com.au

In 1918, Carl KAEFER founded a company specialising in the supply of insulation material and services to the shipbuilding industry. His idea was to use peat to insulate the walls of the cold storage stores.

During the course of over nine decades, KAEFER expanded from an insulation business for the shipbuilding industry with just one office, into an international company with more than 2,000 sites worldwide.

KAEFER Integrated Services has operated in the Northern Territory for over 25 years and most recently they have expanded their services by acquiring an existing painting & blasting facility (formerly known as Blastcorp).

In March 2013 KAEFER announced the expansion of their NT operations by the acquisition of BLASTCORP’s local fixed blasting & painting facility. The Darwin painting & blasting facility consists of 140m² office building, 4000m² land area, 800m² painting bay, 17m x 6m x 5m steel grit blast room with rail & trolley system, grit reclaiming system and lay down area of approx. 2000m². This new facility has enabled KAEFER to expand their Northern Territory services of abrasive blasting and the application of protective coatings.

With this expansion, KAEFER is confident the new facility will be a great opportunity for their NT team, and will position them to service existing clients and target larger industrial maintenance and LNG related work in the future.

Interested in being a showcase company? Has your business recently been involved in an exciting or innovative project? Or have you increased your capability in order to broaden your contracting opportunities? If so, we would like to ‘Showcase’ your business in an upcoming Newsletter. Please call or email Elena to discuss on p. 08 8922 9434 or e. elena.tsangari@icnnt.org.au

Please Note: inclusion of information in the ICN (NT) newsletter is at the discretion of ICN (NT). Contributing Showcase business will be contacted and confirmed prior to publication.

**ICN Gateway (gateway.icn.org.au)**

At the heart of ICN’s services is the ICN Gateway, an online system assisting Australian Businesses find suppliers or identify new business opportunities.

ICN Gateway, which is used domestically and internationally, is a connection point for buyers and suppliers looking to build partnerships in Australian and New Zealand industries. Suppliers can search projects and register their company’s interest with just a few easy steps. ICN Gateway also helps project managers to manage the supplier registration process for their projects.

This powerful online system currently contains over $125 billion worth of projects and more than 50,000 suppliers.

ICN’s dedicated business consultants search the list of suppliers when a buyer approaches ICN looking for new products and services. Every day ICN receive enquiries from purchasers and project managers looking for local suppliers and service providers. By registering your business on ICN Gateway you make sure that your details are available when there is demand for your product or service.

### Tendering News...

The Northern Territory Government has changed the way it advertises and receives tenders. These changes support contemporary and efficient business processes and follow the introduction of a series of system improvements that will save time for businesses in dealing with government.

**Online advertising:** Government future tender opportunities, open tenders, quotes and awarded contract information are available online at [nt.gov.au/tenders](http://nt.gov.au/tenders)

The focus has shifted to online advertising with a banner message in newspapers each week that directs businesses to the website. Awarded contract information is published online and no longer repeated in the Northern Territory Government Gazette.

**Mobile app:** A mobile application has been released for use on smart phones and mobile devices. This app provides tenderers with greater access to business opportunities on the go. The app is a first for government procurement in Australia.

**Upgraded Quotations and Tenders Online System:** Businesses are now able to view, download and lodge quotations and tenders in an upgraded Quotations and Tenders Online system. The system also allows businesses to: view lists of open, closed, awarded and cancelled tenders as well as details of prospective tenderers, closing lists and Future Tender Opportunities;
- receive email alerts as opportunities are released;
- store data to partly pre-fill tender/ quotation response schedules, including standard responses for Local Development/Value Adding and Past Performance tender specification criteria; and
- receive reminders to update business information such as insurance renewals and CAL accreditation.

### ICN Gateway Tip...

ICN Gateway is not only a place where work packages are listed but it is also where announcements of awarded contracts are made. You can view who has been awarded contracts by following this simple step.

Simply click on the status ‘Awarded’ to view the awarded contractor details.

### Your Company Profile...

ICN consultants need to be able to easily identify your capability, at a glance, through your company profile. Below are three of the most common optional sections within your profile that ICN would like to see you review:

- **QA accreditation (If applicable)** - Please list your quality accreditations eg ISO 9001 etc this is important as it is the most common question we receive from principal contractors and is often a prerequisite in supporting your capability. Do not state ‘yes’ in this section—we need specifics.

- **Major clients** - List all of your significant customers that you supply/provide services to. Look across the broad spectrum of industry that you supply and do not focus on one industry unless it is your speciality.

- **Major Projects** - List a brief history of previous projects you have worked on. This should include - who the customer was, time frame or when, location, a brief scope or type of service supplied and an approximate value.
