

STATEMENT OF CAPACITY

Defence Construction Industry in the Northern Territory

STATEMENT OF CAPACITY

Defence Construction Industry in the Northern Territory

The Northern Territory construction industry has strong capabilities to service defence infrastructure projects.

The Northern Territory Government commissioned the Industry Capability Network of the Northern Territory (ICN NT)) to undertake an industry capability mapping and gap analysis study across the variety of trades relevant to defence construction projects. The Northern Territory industry was found to have high capabilities in 61 of the 85 scopes.

The 2016 Defence Whitepaper has outlined over \$20 billion worth of defence construction projects in the Northern Territory over the next 20 years. This presents significant opportunities for prime contractors to partner with the local construction industry to deliver this work.

“ Construction represents 12% of Gross State Product in the Territory, making it one of the largest sectors in the economy. In peak years, the value of construction work undertaken in the Territory reached \$9 billion per annum. There is strong diversity in the projects being undertaken and completed, from world scale LNG Plants to small remote infrastructure projects. This industry delivers a contemporary industrial relations environment, good productivity, appropriate safety, competition across the market and the capacity to deliver high quality projects no matter the location. NT Construction is very much an industry in tune with its market and doing its bit to drive the Territory forward! ”

David Malone
Executive Director, Master Builders Northern Territory

COMMONWEALTH OF AUSTRALIA, DEPARTMENT OF DEFENCE

Territory based businesses have proven experience in delivering on defence construction projects. Numerous Northern Territory construction firms are experienced second and third tier defence contractors and several have undertaken head or managing contractor roles for significant defence projects. This presents opportunities for whole-of-life cost savings and other long-term advantages. The Northern Territory construction industry is experienced in delivering projects in regional and remote areas of the Northern Territory. The study also found that majority owned Aboriginal businesses were represented in 36 of the scopes mapped.

The local construction industry has significant experience in delivering construction projects for Defence, the Northern Territory Government and the private sector, including one of the world's largest and most complex oil and gas developments, the Ichthys LNG Project.

“

The Ichthys LNG Project has benefited immensely from the capability offered by local businesses and the Territory workforce.

INPEX and lead onshore contractor JKC Australia Pty Ltd (JKC) have awarded more than 4700 lower tier subcontracts and purchase orders to more than 1100 Territory business, including 54 Aboriginal and Torres Strait Islander-owned companies to support onshore construction.

With billions of dollars flowing through the Territory economy as a result of construction activity, the INPEX-operated Ichthys LNG Project is proud to have boosted local businesses to become more diverse, competitive and accredited to support an oil and gas development that is world-class.

”

Sean Kildare
INPEX General Manager, Darwin

The 'NT capability' for each construction stream has been categorised based on the following number of businesses:

HIGH 11+ MODERATE 6-10 MODEST 1-5

Site Construction

COMMUNICATIONS

Installation of complete site IT communications systems, ground works for installation, racking systems, power system, air conditioning systems, wiring systems and insulation.

Compliance: Most with Building Code 2013, CAL, AS/NZS ISO 9001:2008 and AS/NZS 4801:2001

Previous clients: Dept of Defence, Defence prime / sub-prime contractors or government.

CONSTRUCTION CONTRACTORS

Procure all equipment and materials necessary and construct to deliver the functioning facility. Scope includes supervision, manpower and equipment.

Compliance: Large majority with Building Code 2013, CAL, AS/NZS ISO 14001:2004, AS/NZS ISO 9001:2008 and AS/NZS 4801:2001.

Previous clients: Dept of Defence, oil and gas or mining industry.

WORKSTATIONS

Supply, deliver and install modular workstations and associated services, including soft wiring.

Compliance: Many with AS/NZS ISO 9001:2008.

Previous clients: Dept of Defence or government.

CEILINGS AND PARTITIONS

Supply, install and warrant all new ceilings, partitions and linings to buildings in each construction zone.

Compliance: Many with CAL and Building Code 2013.

Previous clients: Defence Housing Australia, major construction companies or government.

COMPOSITE ACOUSTIC PANEL CEILINGS

Supply and install acoustic panel ceiling systems to required buildings and associated structures.

ABOUT THE STUDY

The information compiled in the industry capability mapping and gap analysis study is an evaluation of the resources and skills necessary to compete, obtain and provide defence construction work in the Northern Territory.

The Industry Capability Network of the Northern Territory (ICN NT) reviewed the current and potential defence construction projects in the Northern Territory, including Project R8000 and facilities requirements for the New Air Combat Capacity (NACC) at the RAAF Base Tindal. ICN NT looked at the key requirements for local industry to become eligible to win contracts on defence projects and, with input from the Master Builders Association NT, were able to comprehensively map the various capabilities of Northern Territory businesses for typical defence construction projects.

The study found that Northern Territory industry has significant capabilities in the construction sector with at least 940 businesses being identified as capable against the 85 scopes of work analysed and many with previous experience in meeting key Defence requirements.

KEY REQUIREMENTS FOR INDUSTRY

Northern Territory industry recognises that Defence is a sophisticated purchaser of construction services. Engagement with Defence requires local industry to comply with Federal rules and processes. These include but are not limited to:

- Mandatory legislation: Building Code 2013, Federal Safety Commission Accreditation
- Key policy: Commonwealth Procurement Rules, Commonwealth Indigenous Procurement Policy, SMART Infrastructure Manual
- Northern Territory industry has been working closely with the Australian Building and Construction Commission (ABCC) since the passing of legislation in December 2016 to promote the 2016 Building Code obligations to contractors, sub-contractors and suppliers.

Contractor Accreditation Limited (CAL) Accreditation

Contractor Accreditation Ltd (CAL) is a non-profit company established by the NT Chamber of Commerce, the Master Builders Association NT and the NT Small Business Association to manage a scheme of self-regulation for the building and construction industry. Although holding CAL accreditation is not a prerequisite for Defence construction work, it does provide an indication of the financial capacity of the business.

Other Accreditation and Certifications

A number of ISO certifications are recognised in this study including:

- AS/NZS ISO 9001:2008 = quality management systems
- AS/NZS 4801:2001 = OHS management systems
- AS/NZS ISO 14001:2004 = environmental management
- BS OHSAS 18001:2007 = OHS management systems.
